EDUCATION

Alabama A&M University || Normal, AL || GPA: **3.96/4.00**

Expected May, 2027

Bachelor of Science in Computer Science, Concentration: General CS

Coursework: Python Programming, Data Structure, C++ Programming, Intro to Java Programming, Discrete Structures, Advanced Programming, Intro to Digital Logic Design, Probability and Statistics

WORK EXPERIENCE

Summer 2025 - Present

Tutorial Assistance Network

Huntsville, AL

Peer Tutor

- Guided students in problem-solving and debugging, improving logical reasoning and efficiency in their academics.
- Improved Python and C++ skills, achieving 90%+ positive feedback and 50%+ client return rate.
- Worked with fellow tutors to improve tutees' performance by ensuring session holds and sending follow-ups.

Spring 2025

College of Engineering and Technology

Huntsville, AL

Development of 3D Interactive Human Models for Medical Applications in Meta Quest 3s

- Developing interactive 3D human models for medical use, focusing on muscle analysis and pressure monitoring for wheelchair patients using human models, Unreal Engine, and VR technology.
- Evaluating data integrity and system reliability in a VR-based medical application

Summer 2025

Leland Product Management Bootcamp

Huntsville, AL

Student

- Attended classes with Product Managers from various companies, learning key tactics and techniques for success.
- Engaged in one-on-one consultations with seasoned product management professionals, gaining strategic insights and actionable guidance for career advancement.
- Enhanced skills in prioritization, planning, and data-driven decision-making aligned with company objectives.

PROJECT EXPERIENCE

MediLink Africa

- Built an end-to-end healthcare referral platform using **Next.js**, RESTful APIs, and cloud databases, reducing simulated referral processing time by **30%**.
- Developed a scalable, secure frontend with optimized state management, improving task completion speed by **25%**.

Unified Workspace

- Built a unified productivity platform integrating **Gmail**, **Google Calendar**, and **Google Tasks** using **OAuth 2.0** and **Google REST APIs**, reducing context switching and improving workflow efficiency by **60%+**.
- Implemented an **AI-driven task prioritization and scheduling system** with optimized state management and responsive UI design, improving time management by **30–40%**.

AI-Powered Food Recognition & Recipe Generator(CWM)

- Generates ingredient lists and step-by-step cooking instructions, making meal preparation effortless.
- Developed a food recognition tool using Vertex AI API and Google Vision API to identify food items from images and retrieve detailed recipes.

HONORS & LEADERSHIP DEVELOPMENT

• Honors Program Scholar • Presidential Scholar • Deans List Recipient • Certificate for STEM day Presentation • Codepath TIP101 Certificate • Leland Product Management Certificate • PSM I Scrum Masters Certificate

TECHNICAL SKILLS & SOFTWARE PROFICIENCY

- **Languages:** Python, C++, JavaScript, Java
- **Web:** HTML, CSS, Next.js, Node.js
- **Tools:** TensorFlow, Git/GitHub
- **Consulting:** IT & Application Controls, Risk Management
- **Scrum:** Professional Scrum Master
