PROFESSIONAL SUMMARY

Computer Science student (GPA: 3.96) and PSM I-certified practitioner with hands-on experience defining product requirements, leading cross-functional teams, and shipping systems end-to-end. Proven track record of gathering user needs, making data-informed architecture decisions, and delivering measurable outcomes across healthcare, education, and AI domains.

EDUCATION

Alabama A&M University

B.S. Computer Science, Honors Program. GPA: 3.96 / 4.00.

Huntsville, AL

Expected May 2027

Relevant Coursework: Data Structures, Theory of Algorithms, Discrete Structures, Digital Logic Design, Probability & Statistics

EXPERIENCE

Undergraduate Research Assistant

Spring 2025 – Spring 2025

College of Engineering & Technology, Alabama A&M University

Huntsville, AL

- Interviewed clinicians to gather requirements, synthesizing symptoms, edge cases, and references into a data architecture and 3D model pipeline for a Meta Quest 3 medical VR application, resolving 12+ data inconsistencies across two pipeline redesigns.
- Reduced clinician onboarding time by ~20% and doubled processing speed by decoupling sensor data from the render layer.

Peer Tutor, Python & C++

Spring 2026 – Present

Tutorial Assistance Network

Huntsville, AL

- Conducted 100+ sessions for 30+ undergraduates, achieving 90%+ satisfaction and a 50%+ return rate, outperforming dept. averages by 15%.

PROJECTS

MediLink Africa - Healthcare Coordination Platform

Next.js, REST APIs, PostgreSQL, Cloud Infrastructure

- Scoped and defined requirements for a multi-service platform spanning a referral engine, SOS dispatch, and admin governance, establishing service boundaries so hospitals, labs, pharmacies, and patients each scale independently.
- Made data-model and API design decisions across 4 domains, selecting a relational model after benchmarking 200 simulated concurrent users and sustaining 99.9% uptime over a 2-week load test.
- Produced system documentation including an ER diagram, API spec, and runbook, cutting referral time by 30%.

Event Planner Manager

Next.js, Node.js, PostgreSQL, TypeScript, Tailwind, Prisma

- Defined product requirements for scheduling, budgeting, and vendor booking; normalized the data model across 3 entities, reducing confirmation time by ~40%. Vendor module rated 95% by peer evaluators.

Academic AI Tutor - Deep Learning Chatbot

Python, TensorFlow, Keras, Flask, NLP | CS-450 Group Project

- Scoped requirements and coordinated a 4-person team to design and deliver a deep learning chatbot covering 9 academic subjects, spanning a TensorFlow/Keras NLP classifier and Flask web server.

CERTIFICATIONS

- PSM I Scrum Master (Scrum.org)
- Leland PM Bootcamp
- Codepath TIP101

AWARDS & HONORS

- Honors Program Scholar
- Presidential Scholar
- Dean's List

SKILLS

Methods & Delivery: Agile Scrum (PSM I), product requirements, stakeholder communication

Systems & Architecture: REST API design, service decomposition, ER modeling, requirements definition, system documentation, load testing

Languages: Python, JavaScript, TypeScript, C++, Java

Web & Frameworks: Next.js, React, Node.js, Flask, Tailwind CSS, Prisma, Git/GitHub

Data & AI: PostgreSQL, SQLite, TensorFlow, Keras
